Customer Journey Map

A Customer Journey Map illustrates the different stages that a user experiences while interacting with the Strategic Product Placement Analysis system. It helps understand user goals, activities, challenges, and opportunities at each stage, ensuring the developed solution meets business requirements effectively.

Journey Stage	Data Collection	Data Analysis	Visualization	Decision Making	Business Improvement
Customer Activities	Collect retail sales, pricing, competitor, and demographic data.	Analyze product positioning, pricing, and promotional performance.	Improve sales performance and revenue growth.	Identify effective product placement strategies.	Improve sales performance and revenue growth.
User Goals	Gather reliable business data.	Understand customer purchasing behavior.	Gain clear business insights.	Optimize marketing and pricing strategies.	Increase customer satisfaction and profitability.
Pain Points	Data exists in multiple spreadsheets.	Manual analysis consumes time.	Static reports lack interactivity.	Difficulty identifying best-performing products.	Slow business decision-making.
Opportunities	Centralize retail data.	Apply Tableau analytics.	Use interactive filters and dashboards.	Make data-driven decisions.	Improve product visibility and customer engagement.
