Date	15 July 2026
Project Name	Strategic Product Placement Analysis

Dashboard, Story & Webpage Screenshots

This section presents the visual outputs developed as part of the Strategic Product Placement Analysis project. The visuals demonstrate the analysis of product positioning, sales performance, and consumer behavior built in Tableau.

Included Visualizations

The charts below were generated directly from the project dataset (Product_Positioning.csv) and mirror the worksheets built in the Tableau workbook. Replace with live Tableau/Flask screenshots once published, if a closer visual match is needed.

1. Average Sales Volume by Product Position

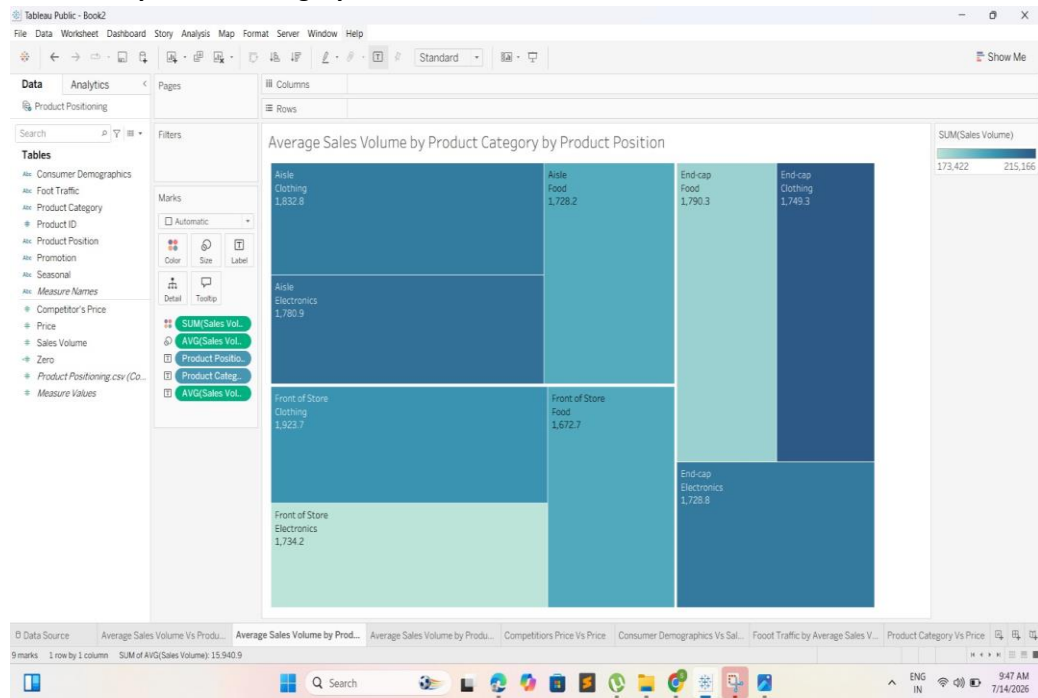

End-cap placements outperform aisle and front-of-store p

positions on average sales

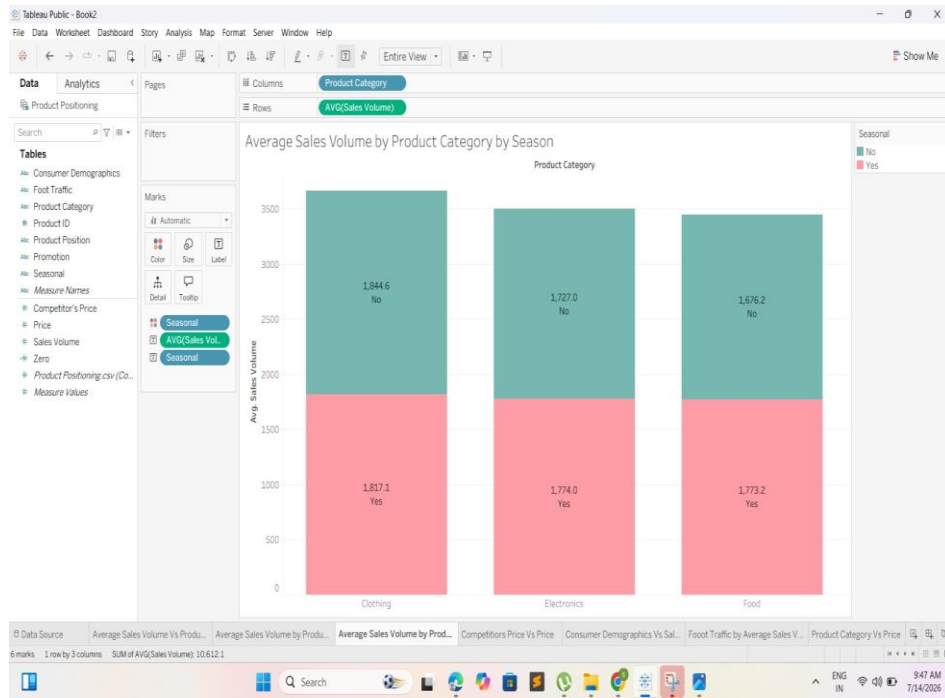

volume.

2. Average Sales Volume by Product Category

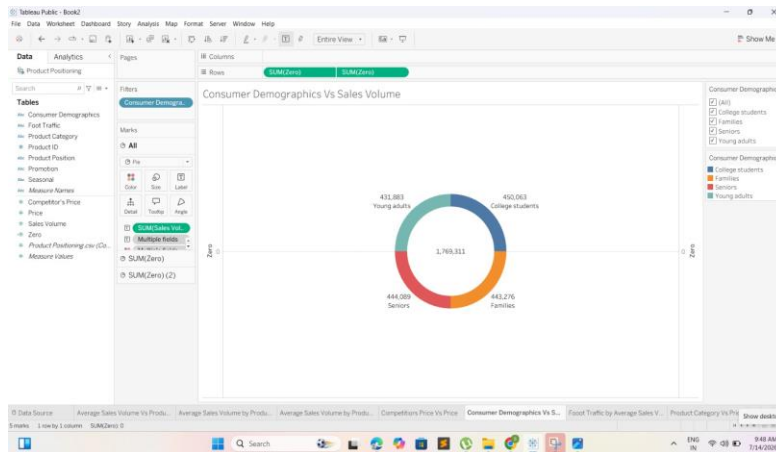

Electronics leads in average sales volume, followed by Clothing and Food.

3. Sales Volume by Category & Position

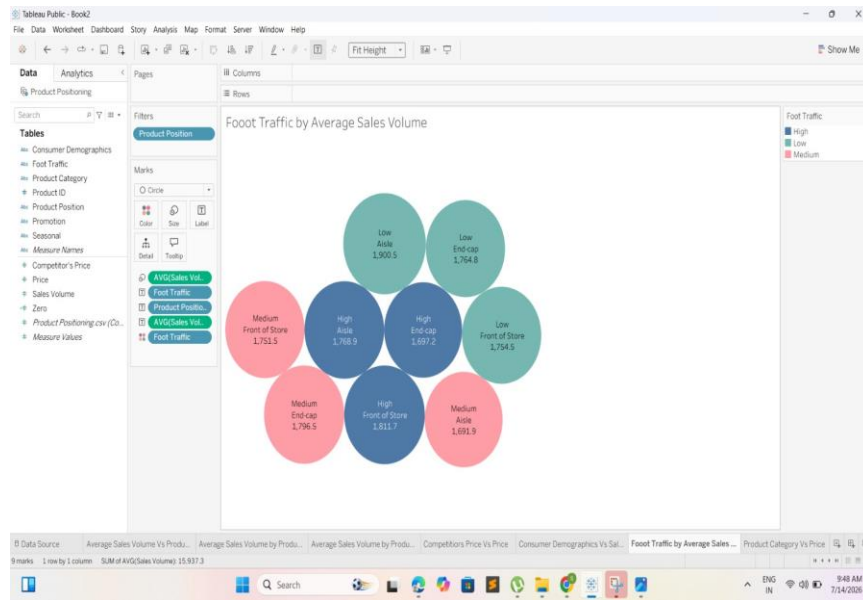

Combined view showing how position amplifies or dampens category performance.

4. Consumer Demographics vs Sales Volume

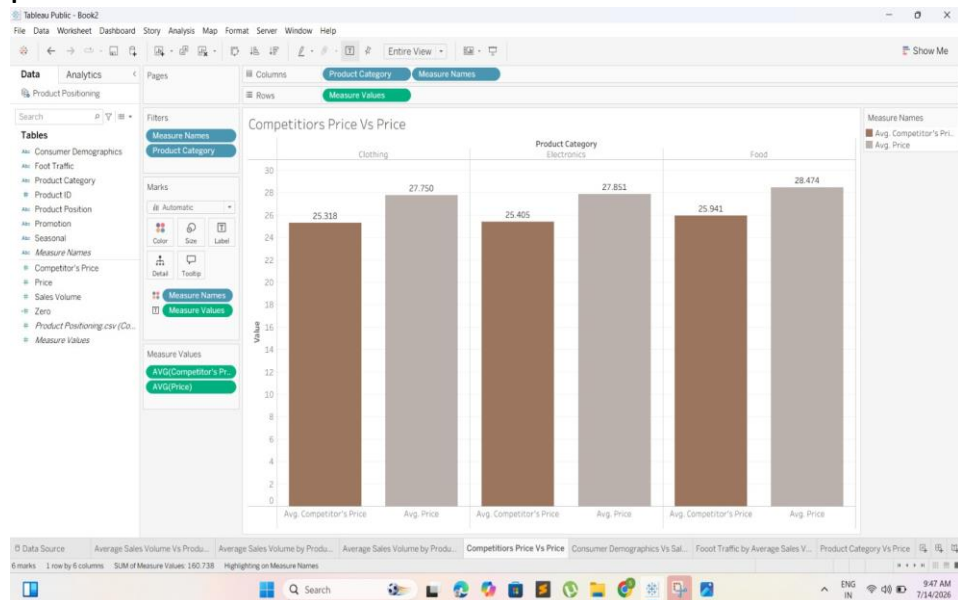

Comparison of average sales volume driven by each consumer demographic segment.

5. Foot Traffic vs Sales Volume

Higher foot-traffic locations correlate with stronger average sales volume.

6. Price vs Competitor's Price

Scatter comparison of product pricing against competitor pricing (dashed line = price parity).
